

Amendments to the Specification:

Please amend the specification as follows:

In the Title, please replace “Magnetic Graphics Display” with --Magnetic Graphics
Mount--

Please replace paragraph 3 of the “Detailed Description” starting at page 3, with the following rewritten paragraph:

The strips 26 of magnetic receptive material are applied to the rear surface of the graphics sheet 18 by a silk screening process. The magnetic receptive material is preferably a metallic, magnetically receptive compound. Preferably, the magnetic receptive material includes a graphite powder mixed with a clear carrier. The clear carrier is preferably a water-based slurry. The resulting magnetic receptive material is preferably provided in ink form to facilitate the silk screening process.
